

We are trying to use BMI270 example at Python environment.  
But we cannot find the "scan.py" and "ble\_NUS.py"  
Could you please provide us to solve this problem?

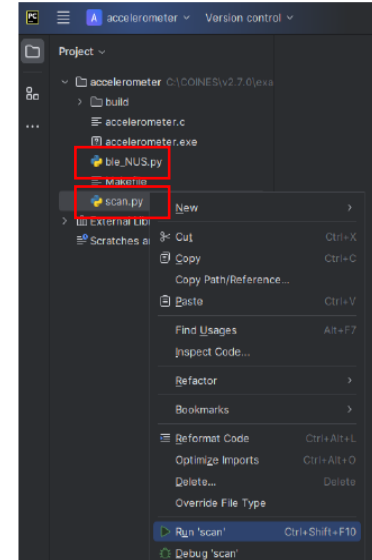

Our environment

We have already installed Anaconda Python.  
But (Anaconda3) is not shown at our system like the document.  
Is this the problem?

#### 4.11 Test BLE connection between APP3.0 board and PC

- On the left panel under "accelerometer" project, right click "scan.py" and select "Run 'scan'" as shown in Figure 14.

#### 4.9 Install Bleak software

- From Windows PC Start menu locate "Anaconda Prompt (Anaconda3)" as shown in Figure 8 and then click it.

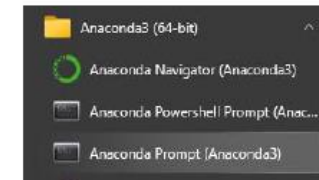

Figure 8 Launch Anaconda Prompt command window
